

EXPRESSION OF INTEREST

of HÉTFA Research Institute – Climate Policy and Sustainability Lab
to join a Consortium as Partner on HORIZON calls:

- **HORIZON-CL6-2022-COMMUNITIES-01-04 Social Innovation in food sharing to strengthen urban communities' food resilience**
- **HORIZON-CL6-2022-FARM2FORK-01-08 Research and Innovation for food losses and waste prevention and reduction through harmonised measurement and monitoring**

Our **Climate Policy and Sustainability Lab** within HÉTFA Research Institute is engaged in socio-economic analyses and policy advice on sustainable development. In our work, the concept of sustainability is interpreted in the broadest sense, therefore HETFA is looking not only at the protection of natural resources, but also at its impact on the quality of human life and the economy. Our main objective is to mainstream this approach into policy-making processes.

Our expertise offer:

- Task Owner / Work Package leading role
- Providing policy advice and contributing to policy development building on HETFA's extensive experience in bringing science and public policy (scholars and decision makers) together
- Elaboration of methodologies that are able to measure the effect of certain interventions and prevent harmful decisions
- Creation of indicators and indicator systems regarding sustainable development to monitor and examine the impact of public policy interventions
- Connections with national food system actors and stakeholders

Expertise relevant to the call:

- Our experts participated in intersectoral working groups engaged in food loss at national and international level, e.g. within the frame of [EU FUSIONS](#) FP7 project (2012-2016)
- Elaboration of municipality-level sustainable strategies, conduction of pilot projects over the last 10 years
- Report with policy advice commissioned by the European Climate Fund on "Cohesion policy 2021-2027 and climate protection goals in Hungary" aiming to make the sustainability aspects of the use of resources in Hungary more prevalent in the upcoming programming period (report issued in 2021 February)
- Ongoing cooperation (2021 October - 2022 April) with the Blue Planet Foundation: Elaboration of sustainable impact assessment methodology for the Hungarian public administration with the aim of incorporating sustainability aspects in decision making processes and preventing harmful investments (upon assignment by the Cabinet of the President of the Republic)
- Longstanding collaboration and participation in international consortia with the support of the International Cooperation Division of HÉTFA Research Institute.
